

Objectives

- Develop an auditing process for evaluating compliance with AAMI, AORN, and CDC guidelines
- Explain the importance of following evidence based published standards and how it relates to patient safety
- Understand the myths and pitfalls of effective communication
- “Real World” vs. “Best Practices” of Supply Chain within the Surgical Services Department
- Describe flash cycles & new AORN recommendations for proper use
- To inform healthcare professionals on their role in meeting the standards
- Define the critical aspects & steps of the decontamination process, and recommendations for maintaining the appropriate environment in the decontamination area
- Review different methods for compliance with sterilization at the point of use
- Understanding of the steps needed to identify, plan, and execute the introduction of systems or enhancements intended to improve efficiency and quality
- Describe how Supply and Equipment Management has evolved
- Describe current & future state and best practices as FDA regulations & the Joint Commission requirements are changing
- Learning what it takes to stay energized in a negative environment
