Recommended Practices for Sterile Processing in Health Care Facilities

Learning Objectives
Saturday, June 10, 2017

Preparation for a TJC or CMS Accreditation Survey (1.0 CE)
Understand the rationale and focus of a healthcare accreditation survey process.
Discuss the latest requirements from TJC and CMS specifically relating to reprocessing of medical devices.
Describe key published standards and recommended practices for safe and effective reprocessing of reusable patient care items.
Explain how healthcare facilities can prepare for a successful accreditation survey.

Sterilization “Test Your Knowledge” Workshop (1.0 CE)
Describe how to correctly use available monitoring tools.
Describe how to routinely release loads with and without implants.
Continued in next column

Speakers

Susan Klacik, BS in Business Administration, CRCST
Susan Klacik has over 35 years of Sterile Processing experience, 30 years as a CRCST instructor and over 20 years as a voting AAMI committee member. She has authored numerous articles on medical device processing, several chapters in the sixth edition of the IAHCSMM textbook as well as the high temperature sterilization chapter in the new seventh edition.

Vickie Edwards, BS, CSPDT
Vickie Edwards has over 25 years experience in the health care industry and has been with the Infection Prevention Division of 3M Company since 1991. She is currently assigned to the 3M Laboratory providing Technical Consulting on Environmental Monitoring, Sterilization Assurance, Hand Hygiene, Patient Monitoring Biomedical Electrodes, Cables and Leadwires. She speaks on a variety of topics in these disciplines. Vickie is credentialed by the Certification Board for Sterile Processing and Distribution.
