3M Health Care – Infection Prevention Solutions
Booth Number 700
www.3M.com/infectionprevention
IAHCSMM Principal Partner
Sponsor: Opening Keynote Speaker, Closing Keynote Speaker, Educational Sessions, Educators Forum, Educator of the Year Award, International Hospitality Suite

3M is pleased to be a 2016 Principal Partner for IAHCSMM’s 51st Annual Conference and Expo in San Antonio. At 3M, science is the foundation upon which we build solutions to help you achieve a higher standard of care. Whether it is Every Load Monitoring, Standards Practice, solutions for endoscope reprocessing, or education programs through 3M℠ Health Care Academy (brought to you by 3M™ Sterile U), we want to help you achieve your goals. The key is collaboration—because together we can create positive change that makes a real difference for patient safety.

During exhibit hours, visit 3M Booth #700 for education mini sessions, hands-on product demonstrations, and the opportunity to share your ‘best practices’ story.

BD
Booth Number 620
www.bd.com/vmueller
IAHCSMM Premium Partner

With a 115-plus year history of developing and manufacturing high-quality surgical instruments, the V. Mueller™ and Snowden-Pencer™ brands encompass one of the broadest lines of general instrumentation.

V. Mueller detergents and instrument processing supplies include products to clean, protect and organize your instruments for cleaning and sterilization.

Genesis™ sterilization containers provide long-lasting protection and maintain sterility for your valuable instrument investment. Available in a wide range of sizes, the Genesis container system offers a variety of baskets and accessories to help you organize and speed instrument set-up. Genesis container lids are available in a wide range of colors so you can easily identify sets and specialty-specific trays. The Genesis container system consistently provides a return on your investment and a green alternative to sterilization wrap.

The V. Mueller brand IMPRESS™ system is a comprehensive and scalable surgical instrument tracking solution that manages and tracks inventory, people and processes throughout the continuum of care—from decontamination and assembly to sterilization and the OR. The IMPRESS system offers varying levels of functionality to meet your unique needs and provides data insights to the OR and Sterile Processing Department to help increase throughput and productivity, reduce case delays and drive instrument standardization.
Belimed

ChemDAQ, Inc.
Booth Number 319

ChemDAQ Inc. is the leading provider of gas detection systems for sterilant and disinfectant chemicals used in healthcare, medical device manufacturing, and other markets. Our monitoring systems detect the concentration of gas or vapor in the air to provide optimal safety coverage in your workplace. User determined alerts and alarm levels enable your department to proactively respond to any issues before they reach a critical state. ChemDAQ offers a robust system which is scaled based on the needs of each facility and set-up. ChemDAQ’s unique sensor filter technology means that our sensors have much lower rates of cross sensitivity than those of other companies. Users can add a DAQ® computer to collect and store data as well as tracking time-weighted averages such as OSHA Permissible Exposure Limits. ChemDAQ offers sensors for a wide range of chemicals, including Peracetic Acid (PAA), Hydrogen Peroxide (H2O2), and Ethylene Oxide (EtO). Calibration with reactive gases such as EtO, H2O2 and PAA can be problematic and so ChemDAQ provides its SXP® sensor calibration service, which not only factory calibrates all your sensors but even keeps track of when they are due.

Since the introduction of single-use Sterilization Wrap in 1978, healthcare professionals have looked to one company for innovation, resources and leadership in sterilization packaging. Today, that company is Halyard Health. Formerly Kimberly-Clark Health Care, Halyard Health is a medical technology company focused on preventing infection, eliminating pain and speeding recovery. Our market-leading sterilization products, including HALYARD* ONE-STEP, QUICK CHECK and SMART-FOLD Sterilization Wrap, are sold in over 100 countries around the world.

Category Listing: Repeat 2015
The Rotomat® Vertical Carousel from Hänel is an automated storage system that solves the problems of limited space and poor inventory control in central sterile processing and OR departments. The Rotomat® replaces inefficient shelves and cabinets, saving floor space and allowing more storage in the same area. Items are brought to the user, eliminating walking, searching and the potential injuries associated with step-ladders.

All items are protected against environmental contamination and physical damage, and secured against theft. Inventory management ensures that departments always have the instruments and supplies they need and that the correct item is supplied on every order. The Rotomat® will save time, reduce costs and increase accuracy.

Stop by to discuss your space and inventory management needs, and we can show you how the Hänel Rotomat® can be tailored to suite your individual application.

hawo GmbH
Booth Number 641

hawo is a manufacturer of sealing systems for the sterile packaging and is active in nearly all countries of the world - known for its quality and the innovative products. Beneath the impulse and rotary sealers, we lately launched three new and innovative systems:

The VeriDoc documentation and labelling system is an absolutely sealer-independent system for the use with each sterile barrier system (wrapped sets, containers, heat and even self-seal pouches) and without the necessity to have a computer in the CSSD.

The fully automatic pouch making machine hm 8000 AS/AS-V SealCut produces sterile bags out of standard film rolls in the individually requested number and size, so that the costs for packaging material are considerably reduced.

The hawo InkTest PRO is a new generation of ink test for checking the seal integrity easily, safe and quickly, as pipettes are not necessary and there is no risk of leakage.

In addition we will be offer 4 different in-booth educational sessions hosted by 4 of the industry’s most widely recognized CS and GI Professionals. There will be a total of four, 30 minute sessions offering a chance to earn CEUs. Visit our booth for the specific times. Seating is limited.

Hospital Safety Solutions
Booth Number 330
www.hospitalsafetysolutions.com

ARE YOU PASSING DIRTY INSTRUMENTS TO THE CLEAN SIDE WITH EXCESS BIO-BURDEN?

SHOULD YOUR FINAL STEP IN INSTRUMENT DECONTAMINATION SHOULD INCLUDE A 60-SECOND UV FLASH?

Hospital Safety Solutions distributes the UV Flash, a UVC light chamber that operates safely at room temperature & pressure. It radiates scopes, cameras, instruments and electronics with UV Light, significantly lowering problematic pathogens, in only 1 minute.

This final step of decontamination can be stand alone unit, or be built into your pass through window.

• Studies have demonstrated that the manually cleaned devices have a higher bacterial colony-forming units (CFU) count than the machine-washed items, but both retain bio-burden even after being cleaned.
• UV radiation does result in significantly reducing CFU counts, thereby improving the safety of handling these instruments.

Independently tested against; Clostridium difficile, Staphylococcus aureus, and Acinetobacter baumannii, with log 4 reduction in C-diff. in 60 seconds.

Uses No harmful chemicals, consumables, or antimicrobial wipes required.

Finally a standardized, repeatable decontamination process that helps to eliminate human error and make instruments safer to handle.
Using the optional UV Verification Strip allows visual confirmation that instruments received proper intensity of UV Exposure.

Inexpensive, easy and safe to operate.

**Category Listing**: Low-Temperature Sterilizers, Infection Control Containment Systems, Cleaning Verification, Antimicrobial Products, Disinfection/Sterilization Supplies

**HR Pharmaceuticals, Inc.**

**Booth Number 1125**

HR Pharma owns, manufactures and distributes the two (2) legacy surgical lubricants: Surgilube & HR Lubricating Jelly, as well as HR Ultrasound Jelly.

In todays health system, reducing cross contamination is a primary key to saving money; HR Pharma developed a product portfolio focused on procedure specific/single use packaging.

Synonymous for premium quality, HR Pharma is the only ISO 13485, CMD/CAS & Kosher certified company in the world manufacturing medical device integrity since 1931.

www.iahcsmm.org

The International Association of Healthcare Central Service Materiel Management (IAHCSMM) is the premier association representing healthcare Central Service (CS) professionals worldwide. Because CS professionals are responsible for cleaning, decontaminating, sterilizing, and distributing medical and surgical instrumentation, they are among the most vital contributors to the delivery of safe, high-quality patient care. For more than 50 years, IAHCSMM has been providing these professionals with the broadest range of certification and continuing education offerings available, along with the unsurpassed support that only a full-service membership organization can bring.

This commitment to advancing CS knowledge, skill sets and professionalism is why over 21,000 professionals rely on IAHCSMM to keep them sharp, focused and abreast of the very latest standards, best practices and technological advancements impacting the CS profession.

Visit us in Booth 1136 to meet Chapter Representatives, learn about our Advocacy initiatives, discuss your educational needs, and ask about certification.

Intuitive Surgical
Booth Number 727

Intuitive Surgical, Inc. is the global technology leader in minimally invasive robotic-assisted surgery. The company's da Vinci® Surgical System offers surgeons superior 3D HD visualization, enhanced dexterity, greater precision and control, as well as ergonomic comfort for the optimal performance of minimally invasive surgery.

Intuitive®'s exclusive EndoWrist® Instruments are designed to provide surgeons with natural dexterity and full range of motion for precise operation through tiny incisions. Modeled after the human wrist, EndoWrist Instruments can offer an even greater range of motion than the human hand. They truly allow the da Vinci® System to take surgical precision and technique beyond the limits of the human hand.™ Similar to human tendons, an EndoWrist Instrument's internal cables provide maximum responsiveness, allowing rapid and precise suturing, dissection and tissue manipulation.

Intuitive offers a team of highly trained individuals, professionally certified in central services, who are committed to partnering with our customers to successfully integrate da Vinci products into the Central Services Department operations. We would appreciate it if you stopped by our booth to ask any questions you may have or see what we are working on to provide you with a better understanding of how to efficiently and successfully reprocess our products.

Karl Storz Endoscopy-America
Booth Number 634
www.karlstorz.com
IAHCSMM Premium Partner

KARL STORZ has offered technologies reflecting visionary design and craftsmanship for over 65 years. Additionally, we provide a range of repair and support solutions to help safeguard your technology investment and enhance the long-term value of our products. Our Protection1® program includes Field Service Technicians who perform minor onsite repairs, provide timely exchanges for damaged endoscopes, provide routine preventative maintenance inspections and offer in-service programs for ongoing staff education. Many hospitals choose an on-site KARL STORZ technician manage their equipment. On-site Endoscopic Specialists at the hospital provide face-to-face support right where critical equipment is used, including inside the OR. We combine hassle-free customizable service with reliable protection against unforeseen downtime and unanticipated costs with No-Fault Service Plans providing peace of mind from knowing your equipment is fully covered. KARL STORZ also offers Custom Service Solutions, including asset management programs that support quality improvement processes for the OR and central services.
Kem Medical Products Corp.
Booth Number 912
www.kemmed.com

Kem Medical Products offers a complete line of monitoring badges for toxic chemicals used in the healthcare environment, real-time monitors, neutralizing products, spill kits and premium sterilization barcode labels, ribbons and accessories.

KemSure® premium sterilization barcode labels have been developed specifically for sterilization processing. Designed to withstand the rigors of sterilization processing, they provide durability and print reliability. KemSure labels are an ideal component for all instrument tracking systems. Available in eight sizes, seven colors and 3” and 1” cores.

KemSafe™ neutralizing products provide a safe and effective way to dispose of glutaraldehyde and OPA. Available in both liquid and powder formulas, they deactivate and neutralize used glutaraldehyde and OPA. KemSafe renders these HDLs to a non-toxic solution for safe disposal. Fast-acting, convenient and economical, KemSafe protects employees and the environment.

VAPOR-TRAK® monitoring badges and on-site surveys measure employee exposure to toxic chemical sterilants and high level disinfectants (Ethylene Oxide, Hydrogen Peroxide, Acetic Acid, Glutaraldehyde, Formaldehyde). VAPOR-TRAK monitoring badges are also available to measure exposure to waste anesthetic gases, laboratory gases and solvents. Hospitals will clearly demonstrate proof of regulatory compliance to OSHA specific PELs, ANSI/AAMI ST 58:2013, Joint Commission as well as other applicable regulatory agencies.

Medisafe America
Booth Number 519
www.medisafeamerica.com
IAHCSMM Premium Partner

Medisafe America is the World Leader of Sonic Irrigators, Washer Disinfectors and innovator of the Distal Duck Tip Soakers. Medisafe has a full line of Sonic Irrigators from tabletop to floor models. The SI PCF answers your need for a validated, automated robotic instrument reprocessor with thermal disinfection that reprocesses up to 10 robotic or 40 lumened instruments. Our latest addition, the PCF Pro reprocesses up to 60 lumened instruments per cycle, with air purge dry assist, innovative microprocessor controlled sonic scaling-to target sonic power and color changing LED lighting to visually notify you of the current cycle status. The revolutionary Niagara SI PCF is the first pass-through washer disinfecter with built in Sonic Irrigation! The Niagara SI PCF is able to reprocess up to 144 lumened instruments of which 48 lumened instruments are submerged in the sonic basin and irrigated.

Medisafe’s Distal Duck Tip Soaker is prefilled with a concentrated pH neutral enzymatic detergent then placed onto the tip of the instrument to retain moisture for easy cleaning and protection during transport from the OR to SPD. The Distal Tip Soaker comes in three convenient sizes, Large, Regular and Mini to fit instruments from stapler/endoscopes to micro surgical instruments. The Soakers assists you in following ST79 Containment and Presoaking guidelines and is recommended by leading manufacturer’s IFU’s for keeping instruments moist between point of use (OR) and reprocessing (SPD). Scientek Technology Corporation  
Booth Number 742  
www.scientek.net  
IAHCSMM Professional Partner  
Scientek offers a complete line of cart washers, washer decontaminators, drying cabinets for inhalation tubing and scopes, custom work tables and wash stations as well as other many other products for the healthcare industry. Scientek is committed to bringing to market products that are both reliable and innovative while providing a low cost of ownership through the use of non-proprietary parts. Pumps, valves and other replacement parts are available from Scientek, the OEM and common industrial equipment distributors. Scientek uses no rubber or plastic connectors in the manufacturing of their washers; all system components, piping and connection flanges are stainless steel. Tuition free service training for hospital biomedical staff is available eliminating the need for costly service contracts. Scientek specializes in custom fabrication to meet the facility needs and space requirements.
Serim Research Corporation is a medical device, R&D and manufacturing company specializing in test strip technology for the healthcare industry. It is Serim’s goal to develop quick, reliable and economical tests that meet the customer’s needs for infection control.

The Serim PINNACLE Monitor for Automated Enzymatic Cleaning (Product Code 5176) was developed for regular monitoring of the cleaning efficacy of medical washer-disinfectors and ultrasonic cleaners by detecting the detergent concentration, mechanical action, contact time temperature of the cleaning process.

Serim PINNACLE Monitor for Manual Enzymatic Cleaning (Product Code 5179) detects the presence of active enzymes in manual bath solutions using enzymatic detergents, thereby guarding against the use of enzyme detergents that are expired or contain inactive enzymes.

All Serim DISINTEK™ High-level Disinfectant Test Strips are 510(k)-cleared by the FDA and ensure that high-level disinfectant used in healthcare facilities are at the Minimum Effective Concentration established by the manufacturer.

Serim test strips incorporate a simple one- or two-step process and provide quick results and long opened bottle use life, to save you both time and money.

SP-Concepts – The INSPEKTOR
Booth Number 1136
www.sp-concepts.com
IAHCSMM Premium Partner

The creators of the INSPEKTOR Channel & Lumen Inspection Systems.

The INSPEKTOR offers a quick and easy way to visually confirm the cleanliness of the inside of instrument lumens and flexible endoscope's working channels. This waterproof system offers 9X magnification and can be used with or without a computer.

The INSPEKTOR Family includes:

- INSPEKTOR Mini is 1 mm diameter and is perfect for inspecting small lumen instruments bronchoscopes, Baron suction tubes...)
- INSPEKTOR Standard is 2 mm and designed to inspect the majority of instruments lumens including shaver hand pieces, laparoscopic instruments and flexible endoscopes.
- INSPEKTOR GI is 950 mm long and designed for inspection of duodenoscopes, gastroscopes and colonoscopes working channels and elevators. Inspect channels as long as 1,900 mm.

Visit our booth # 1136 and discover how quick, easy and cost effective it is to visually confirm the inside of your instrument lumens are as clean as the outside. All three systems will be available to trial at our booth.

Physicians and hospitals should always have the best possible means to ensure the most positive patient outcomes, while being able to maintain their own financial health and success. To help our customers achieve this, we are committed to delivering exceptional care outcomes, patient safety, and financial results in over 1,000 hospitals and health systems, supporting 13,000 physicians during 350,000+ procedures annually. This makes us the market leader in perfusion and intraoperative neuromonitoring, and the industry’s choice for autotransfusion, sterile processing management, surgical assist, and minimally invasive surgical support. In addition to nearly 1,400 clinicians providing superior quality care at the local level, our national presence gives our medical department access to extensive, unmatched clinical data for conducting research to identify trends, determine benchmarks, disseminate best practices, and foster innovation that maximizes patient outcomes while minimizing costs. We hold accreditation in Surgical Ambulatory Healthcare and certification in Healthcare Staffing Services from The Joint Commission. By leveraging the rigor of these programs, our extensive experience, and our own university—which includes a fully equipped OR for training—we develop expertise beyond industry requirements so that surgical teams can be certain they have the best partner for clinical excellence, always.

Suburban Surgical Company
Booth Number 533

THE KEY WORD IS QUALITY. IT'S OUR SPECIALTY — OUR DRIVING FORCE.
For more than 65 years and three generations, we have designed, engineered and manufactured the highest quality equipment available for the hospital market. We research the needs of the marketplace, design the best products to meet these needs, and manufacture all of our products to exacting specifications. By taking these measures, we ensure that each item we sell performs excellently throughout its entire lifecycle.

Suburban Surgical's plan is continued growth in the industry through continued customer communication, the development of new products, along with the continued improvement of existing products. We want to provide you with the highest quality products, backed by the highest quality service.

Whether you're outfitting a brand-new facility, remodeling, moving, or simply looking to add some new stainless steel equipment such as -- Open/Closed Case Carts, Supply/Exchange Carts, IV/Mayo Stands and Instrument/Work Tables -- SSCI is dedicated to meeting your needs. Call our Sales department today and put us to work for you.

Category Listing: None Provided
Surgical Site Infection Prevention, LLC
Booth Number 1329
http://www.ssipllc.com/

Surgical Site Infection Prevention (SSIP), LLC is a leading distributor, importer and manufacturer of single use surgical site infection prevention products.

Clinical studies highlight the shortcomings of current surgical equipment sanitization practices. SSIP is challenging surgical staff and patients to evaluate current surgical equipment sterilization practices which might leave devices contaminated. Evaluation of current surgical sterilization practices is surfacing more frequently after state-specific decisions to publish the names of hospital systems with high infection rates.

Hospital acquired infections are not an easily resolved problem, but disposable surgical products allow hospitals and surgical centers to ensure sanitized equipment unique to each procedure free of foreign matter. Surgical Site Infection Prevention LLC offers a complete line of disposable suction devices and other single use products that assist surgeons in providing the highest quality care to their patients.

Stop by our booth to experience the benefits of disposable surgical products and ask our equipment specialists how disposable products might be integrated into your current surgical product collection.

We offer a system evaluation service.  
We test STEAM QUALITY according to the new ST-79 standard.  
We cover all of North America  

Tray Check  
Booth Number 1138  

Are loaner trays driving you crazy? When's the last time you sat down to evaluate your loaner policy? If your facility is facing challenges managing loaner instrumentation, Tray Check is your only solution.  

This self-service kiosk empowers vendors to properly document and photograph equipment before it ever enters your sterile processing department. Vendors capture crisp, clear digital photos of their valuable equipment with a high-definition camera, taking the responsibility off of your staff.  

Are you still using a hand-written equipment log? Achieve instant compliance from vendors by utilizing this device to print custom labels with pertinent case information.  

This kiosk is fully integrated with oneSOURCE Document Site. We ensure the highest level of safety standards by providing the most recent instructions for use. The system can stand alone or complement your existing in-house tracking system.  

Tray Check also keeps you in the know with email and text message notifications. Schedule case information and have your vendors add trays before visiting the facility, then quickly match equipment to cases during check-in.  
Tray Check makes it easy to take control of your loaner tray program.

The UniteOR platform allows for all those involved, OR Staff, Sterile Processing and Vendor Representatives, to communicate seamlessly and easily via a common portal.

V. Mueller (please reference listing for BD)
Booth Number 620

Velmed, Inc.
Booth Number 908
www.velmedinc.com
IAHCSMM Professional Partner

Velmed manufactures the STOPPER Corner Shield and STOPPER Edge Protector. The Stopper Corner Shield prevents holes, rips, tears in the 'Blue Wrap' from heavy and sharp cornered Surgical and Loaner trays with either round or straight corners. The STOPPER Edge Protector helps prevent holes, rips tears along the horizontal edges and underneath the tray by elevating it off the blue wrap. In addition it allows for easier sliding of heavy trays and acts as a buffer from trays that might be temporarily stacked on top or placed on a metal rack. When used with the STOPPER Corner no part of the tray sits on the blue wrap. This aids in transportation, sterilant dispersion, air circulation which results in faster drying times. The products are VALIDATED for Steam, EO and Plasma sterilization. They are Resposable, Multi Use, Recyclable and very Environmentally friendly.

Waterloo Healthcare
Booth Number 422

Waterloo Healthcare is the most well-known and trusted medical cart manufacturer in the United States. We have been manufacturing medical carts for over 40 years and are known for our full-range of medical carts including:
- Emergency/ Crash Carts
- Anesthesia Carts
- Isolation Carts
- Bedside /Nurse Server Carts
- Procedure Carts
- Phlebotomy carts
- Medication Carts

Waterloo Healthcare manufactures carts in both lightweight aluminum and economical steel. Our high grade aluminum carts offer not only strength but incredible maneuverability. Our aluminum carts are 35% lighter than comparable steel carts! Additionally Waterloo aluminum carts include metal drawer dividers in ALL drawers and come standard with two pull out side shelves!

Waterloo carts offer a variety of locking options, including Lever-lock (for use with plastic security seals), Key locking, Mechanical Pushbutton Keyless, Electronic Keyless and even Proximity Keyless Locks which allow access to your cart using HID employee badges!

Carts and drawer fronts are offered in a variety of color combinations to make your carts easy to identify.

Our local representatives are happy to bring a cart in for your facility to evaluate...Just give us a call or drop us an email

WFHSS 2016 - 17th World Sterilization Congress
Booth Number 1142

The 17th World Sterilization Congress will be held from the 26 - 29 October 2016 at the Brisbane Convention and Exhibition Centre, Queensland, Australia when this 4-day annual congress steps on Australian shores for the first time.

The focus of this event is to ensure that prominent professionals and trade partners from all continents have the opportunity to exchange their knowledge and expertise globally. This is a wonderful occasion to share knowledge and technology that leads to evidence-based best practice, standardization and innovation of key concepts, and to exchange ideas and discuss issues and standards that effect our profession. In addition, we all have a common goal: that the reprocessing of Reusable Medical Devices (RMD) is performed efficiently and with patient safety as our priority.

The World Forum covers topics such as sterilization procedures, cleaning, traceability, international practices, environmental factors, advanced technologies, contamination risks and other risks.

For further information visit the congress website www.wfhssbrisbane2016.com

Category Listings: Associations, Continuing Education

Xerafy Ltd.
Booth Number 741

Xerafy helps improve patient safety and process efficiency with RFID tags for surgical instruments and trays that survive repeated autoclaves to provide traceability through SPD, storage and the OR.

Xerafy’s read-on-metal RFID UHF tags comply with stringent FDA, ISO and EPCglobal requirements. XS Series tags provide a long read range and are small enough to be embedded or attached to surgical instruments and medical devices.

Applications include:

- Automatically record when items enter and exit the autoclave to build sterilization records.
- Create an accurate inventory of each instrument contained within a tray.
- Automatically record all stock movements of trays and instruments to support asset management, audit and inventory control operations.
- Automatically count and detect items in the OR to prevent URFOs

By providing accurate, hands-free monitoring, Xerafy and its partners are helping hospitals raise patient safety, improve asset management, reduce search time and streamline reporting.
