CS MEDICAL
Booth Number 443

Founded in 2003, CS Medical LLC is a leader in developing, manufacturing, and marketing medical devices that are designed to provide high-level disinfection of ultrasound TEE probes. Our products are engineered and developed with one single objective in mind: to minimize the potential of patient exposure to improperly reprocessed TEE ultrasound probes. Our core product, the TD 100, is an example of our ongoing commitment to innovation and to the health and safety of medical patients and staff.

Beyond high-level disinfection of TEE probes, CS Medical believes in managing the quality of care given to delicate TEE probes. TEE Complete Care™ offering provides solutions for the healthcare facility to minimize TEE ultrasound probe damage and reduce the potential of contaminating high-level disinfected probes prior to use. The products address the following areas: bedside cleaning, electrical leakage testing, drying, transporting and storing the TEE ultrasound probe. Our objective is to manage the care given to each TEE probe thus allowing for a reduction in healthcare associated infections.

www.csmedical.com

Hänel manufactures the Rotomat® Vertical Carousel, an automated storage system that solves the problems of limited space and poor inventory control in central sterile processing and OR departments. The Hänel Rotomat® replaces inefficient shelves and cabinets, saving floor space and allowing more storage in the same area. Items are brought to the user, eliminating the time-consuming need to walk in search of supplies, as well as the potential injuries associated with climbing stepladders and carrying heavy objects.

All items are protected against environmental contamination and physical damage, and secured against theft. Inventory management ensures that departments always have the instruments and supplies they need, and that the correct item is supplied on every order. The Rotomat® saves time, reduces costs and increases accuracy.

Visit Hänel to discuss your space and inventory management needs, and we can show you how the Rotomat® can be tailored to suit your individual application.

INTUITIVE MEDICAL DEVICES
Booth Number 1037

At iMD we are committed to developing product that serve our customers changing needs. We continually collaborate with hospitals and medical staff in search of innovative products to improve efficiencies, cost, and drive safety.

INTUITIVE SURGICAL
Booth Number 839

Intuitive Surgical, Inc. is the global technology leader in minimally invasive robotic-assisted surgery. The company's da Vinci® Surgical System offers surgeons superior 3D HD visualization, enhanced dexterity, greater precision and control, as well as ergonomic comfort for the optimal performance of minimally invasive surgery.

Intuitive®'s exclusive EndoWrist® Instruments are designed to provide surgeons with natural dexterity and full range of motion for precise operation through tiny incisions. Modeled after the human wrist, EndoWrist Instruments can offer an even greater range of motion than the human hand. They truly allow the da Vinci® System to take surgical precision and technique beyond the limits of the human hand.™ Similar to human tendons, an EndoWrist Instrument’s internal cables provide maximum responsiveness, allowing rapid and precise suturing, dissection and tissue manipulation.

Intuitive offers a team of highly trained individuals, professionally certified in central services, who are committed to partnering with our customers to successfully integrate da Vinci products into the Central Service department operations. We would appreciate it if you stopped by our booth to ask any questions you may have or see what we are working on to provide you with a better understanding of how to efficiently and successfully reprocess our products.

INVENTORY SOLUTIONS PLUS
Booth Number 539

Inventory Solutions Plus is a healthcare physical-asset management company. We remove, transport, recycle, and liquidate surplus medical equipment and supplies for hospitals, medical centers and manufacturers. Our service eliminates the handling and storage costs that non-functional and outdated medical equipment and disposables create in your facility. Inventory Solutions Plus not only frees up valuable floor space, it spares you the responsibilities and expenses that accompany regulation-compliant removal. Inventory Solutions Plus charges no fee for any of our services and donates a part of what we acquire to reputable medical charities. The only thing you receive from Inventory Solutions Plus, beyond a full accounting of our work, is valuable floor space and the savings it represents. Please visit us to learn how Inventory Solutions Plus can turn your storage areas into additional office space and treatment rooms.
KARL STORZ has provided state-of-the-art technologies reflecting visionary design and craftsmanship for over 70 years. We also offer a wide array of leading repair solutions to help safeguard customers’ technology investments while enhancing the long-term value of our products. In addition, KARL STORZ now offers sterilization containers as the foundation of a simple-yet-effective system for protecting delicate endoscopic equipment and instrumentation during sterilization, transport and storage. The innovative container system also helps to reduce waste by eliminating the need for the conventional medical blue wrap required by traditional sterilization systems. Custom designed to accommodate KARL STORZ endoscopes, camera heads and instruments, the durable containers have been validated for a variety of sterilization modalities. Each KARL STORZ sterilization container includes a container base and lid with an integrated filtration system and silicone gasket to ensure a secure seal. Custom basket trays with silicone holders for instrumentation and accessories are also available.

www.karlstorz.com

Kem Medical Products offers a complete line of monitoring badges for toxic chemicals used in the healthcare environment, real-time monitors, neutralizing products, spill kits and premium sterilization barcode labels, ribbons and accessories.

KemSure® premium sterilization barcode labels have been developed specifically for sterilization processing. Designed to withstand the rigors of sterilization processing, they provide durability and print reliability. KemSure labels are an ideal component for all instrument tracking systems. Available in eight sizes, seven colors and 3” and 1” cores.

KemSafe™ neutralizing products provide a safe and effective way to dispose of glutaraldehyde and OPA. Available in both liquid and powder formulas, they deactivate and neutralize used glutaraldehyde and OPA. KemSafe renders these HDLs to a non-toxic solution for safe disposal. Fast-acting, convenient and economical, KemSafe protects employees and the environment.

VAPOR-TRAK® monitoring badges and on-site surveys measure employee exposure to toxic chemical sterilants and high level disinfectants (Ethylene Oxide, Hydrogen Peroxide, Acetic Acid, Glutaraldehyde, Formaldehyde). VAPOR-TRAK monitoring badges are also available to measure exposure to waste anesthetic gases, laboratory gases and solvents. Hospitals will clearly demonstrate proof of regulatory compliance to OSHA specific PELs, ANSI/AAMI ST 58:2013, Joint Commission as well as other applicable regulatory agencies.

Solutions for safe work environments.

www.kemmed.com
Key Surgical is a leading provider of supplies for sterile processing and the operating room. Our focus is to make sure you have the right tools and education for decontamination, sterilization, as well as sterile supplies. We proudly serve hospitals and surgical centers throughout the world by providing the highest quality products to support your dedication to patient safety and positive surgical outcomes. We are a trusted one-stop shop for sterile processing essentials such as:

Instrument cleaning brushes
Instrument protection
Instrument stringers
Trays
Tags

We invite you to visit us at our booth (#509) and 'shop' our product samples display. We believe in the importance of education and to that end we will have free CEUs at our booth. Check out the education listing to see the schedule.

www.keysurgical.com

Knight HC makes instrument cleaning easy. Our products simplify pre-cleaning, improve efficiency, validate chemical processes, and promote compliance to regulatory requirements. See us for point-of-use systems, instrument and endoscope reprocessing.

www.KnightHC.com

With over 70 years of experience, we offer a diverse product line that transports, stores, heats, cools, serves, dispenses, organizes, displays and merchandises. To meet the dynamic aspect of the industries we serve, Lakeside is continually engineering new products and updating existing products to stay in tune with industry trends and our customers’ unique needs. As a quality-driven manufacturer, we produce our products right here in the USA. With a state-of-the-art facility, we utilize safe manufacturing processes and continually work towards reducing our global footprint.

www.elakesidehealthcare.com
LogiQuip, Healthcare Storage Solutions, will be introducing a new line of flexible endoscope storage products that features high capacity storage of all flexible endoscopes, HEPA filter air circulation, channel purge and many other innovative features. It complies with requirements specified by SGNA, AAMI, AORN and other organizations.

Also, our storage expertise enables you to increase your storage capacity by up to 50% or reduce storage footprint of your current inventory by up to 50%. Utilizing our unique, high density storage systems and our expert storage/inventory analysis and planning, LogiQuip can assist you with your most difficult storage problems.

LogiQuip offers these products for SPDs and many other hospital locations:
- Wire shelving and track systems
- PAR Level and exchange carts
- Instrument container washer/decontam carts
- Case carts, treatment and crash carts
- Height-Adjustable Work Stations & Sinks
- Linen carts
- PAR STOR® III for high density, drawer type storage
- PAR WALL® for open, easily accessible storage (Ask about us Kan Ban)
- LogiCell® for closed mobile cart or casework/cabinetry storage used in ORs, Cardiac Cath Labs, ERs and many other locations

Please stop and visit us at Booth 1024 for a complete discussion of your storage. You can also earn 0.5 CEU’s after participating in an in-service titled INSTRUMENT AND SUPPLY STORAGE: MORE IMPORTANT THAN YOU THINK.

MAYO CLINIC
Booth Number 342

Mayo Clinic has been ranked No. 1 hospital in the nation by U.S. News and World Report Best Hospitals 2016–17. Mayo Clinic Arizona is ranked No. 1 hospital in Arizona, with national ranking in 10 medical specialties.

Staff reviews place Mayo Clinic on Glassdoor's Top 50 Best Places to Work in 2017 list.

MCGAN TECHNOLOGY, LLC
Booth Number 1117

McGan Technology, a leading supplier of products that create a better work environment in the CSD and products to assess the integrity of instruments ensuring the quality of their performance. Insulation

- Integrity Testers - to test the integrity of jacketed electrosurgical instruments detecting defects, cracks and pinholes that cause non-intended tissue burns.

The MM513 hand held detector uses a rechargeable battery, is light weight and can be carried to different work stations. Accessories like the bi-polar instrument test fixture are used to reduce the inspection process time and Wire Tester used to test wire integrity to help prevent the possibility of an OR fire from accidental sparks from damaged wire coatings.

The MMPD-8K has a RoHS compliant rechargeable battery and is portable but is designed as a desktop unit or for usage in a van since it is more rugged.

- Temperature and Humidity Monitoring Systems-
  wireless temperature and humidity alarms and data loggers.

MEDICAL OPTICS
Booth Number 330

Medical Optics strives to be one of the industry leaders for your equipment, endoscope and instrument repair including complete restoration needs. For over twenty years, our service technicians and Research & Development teams handle every piece of equipment with expert precision and unparalleled care at our state-of-the art facility. We adhere to the highest standards of excellence, and provide reliable service to our clients globally throughout North and South America, Europe, Asia and Australia.

www.medicaloptics.com
MEDICAL RESOURCES
GROUP LIMITED
Booth Number 533
Medical Resources Group Limited is the North American distributor for the ADEPT Medical SteriProtect Corner Protector.

The SteriProtect is a simple and effective solution to eliminate sterilization wraps perforation and prevent surgical instrument tray corner damage during sterilization. Additionally, Medical Resources is a leading distributor of equipment, instrumentation and supplies utilized in the processing, packaging, sterilization, storage and transport of sterile goods.

Medical Resources has identified and sourced manufactures from around the world that provide high quality state of the art technologies that define today’s and tomorrow’s work environment.

Our product offering includes case carts, custom sinks (both fixed and hydraulic), sterile storage systems, prep and pack tables, RFID instrument tracking devices, ultrasonic cleaners, surgical instruments, instrument storage containers and custom fabrication of stainless steel

MEDLINE INDUSTRIES, INC.
Booth Number 131
IAHCSMM Premium Partner
We at Medline value the central sterile function. More importantly, we value the people in SPDs: their time, their budgets and their challenges. We also truly understand the detailed effort that goes into ensuring the sterility of the instrumentation. That’s why we take a meticulous approach to bring together the broadest line of essentials for every step of the central sterile process, including the instrumentation itself.

As the nation’s largest privately held manufacturer and distributor of quality medical supplies and services, Medline offers healthcare products and services that drive value through tailored solutions across the continuum of care. The company is headquartered in Northfield, Ill. and has more than 1,200 dedicated sales representatives to support its broad product line and cost management services.

www.medline.com

MEDVANTAGE
Booth Number 638
IAHCSMM Professional Partner
MedVantage specializes in innovative, technology-driven and easy-to-use labeling systems that help ensure patient safety, comply with regulatory safety standards, and reduce risk. Over 1,200 hospitals throughout the country use our labeling systems.

SteriDate is a labeling solution designed to address all Sterile Processing labeling needs, as well as other departments within a healthcare facility. Driven by a user-friendly Microsoft tablet or your facilities desktop computer, these durable label printers allow staff to print comprehensive labels on-demand while identifying the tech ID. Label formats and data are stored in the memory and can feature an automated date and time stamp to consistently deliver complete, accurate, and legible information to improve accuracy, patient safety, and compliance.

The ultimate goal is for SteriDate to provide reliable and accurate information, eliminating errors and guess work. Don’t miss the opportunity to try our system at this year’s Vendor Exhibit. Stop by the MedVantage Booth #638.

oneSOURCE Document Site: A FACILITY-WIDE SOLUTION

Immediate, online access to current validated manufacturers’ Instruction for Use (IFU) documents and manuals for Surgical Instruments/Equipment/Biomed and Dental. With the click of a mouse, everyone wins: your patients, your Central Sterilization department, your OR, your infection Control Management teams and your bottom line. Patient safety is top priority for your healthcare facility and it’s job one for your CS Department. Unless you’re following the validated manufacturers’ IFU and Biomed Maintenance Documents to the letter, patient safety is at risk. oneSOURCE allows your Infection Control and Risk Management teams to know that your facility is in compliance with accreditation standards for AAMI, CMS, Joint Commission, JCI and AAAHC. oneSOURCE improves performance in the OR by tracking physician preference and managing time. All these benefits enable you to save time, space and money. That’s why healthcare facilities across the world ask for oneSOURCE by name.

www.onesourcedocs.com
OSM is the daily meeting place for decisionmakers in facilities performing ambulatory surgery. We help OR leaders achieve excellence, efficiency, economy, employee safety, empowerment and entrepreneurship through ethical, balanced, accurate journalism.

Based in the Metro Atlanta area since 1993, Paces MedEquip is a med-tech company specializing in surgical instrument and scope repair services, and specialty instrument and equipment repair. Expansion into these specialty areas provides maintenance and repair of larger O.R. equipment like yellowfin stirrups, table attachments, and a large variety of multi-component, complex retraction systems. Paces also has a large focus on the sale of pre-owned instrumentation and equipment, such as complete endoscopy systems and flexible and rigid scopes.

PARAMETRIK is a flexible endoscope reprocessing service provider utilizing the only FDA 510K cleared flexible endoscope digital cleaning™ process coupled with friendly low temperature terminal sterilization. PARAMETRIK’s MACH I digital cleaning™ technology is cleared to clean ALL flexible endoscopes including endoscopes with small lumens, and is cleared for parametric release. The MACH I Endoscope cleaning machine removes the risk for human error by automating the cleaning process. This impressive digital cleaning™ technology holds 29 patents worldwide and exceeds FDA levels of clean by 400%.

PEDIGO is dedicated to manufacturing high quality healthcare equipment and providing innovative solutions, preventing infection and improving patient outcomes. PEDIGO’s ergonomically designed rev•o•lu•tion™ closed case carts boast a number of distinct features that make this cart safe, easy to use and unique to the industry. In addition to the standard maintenance-free re•volve™ casters, these carts feature Cool Touch polymer handles and scratch-resistant windowed cart doors. CartStat indicator ensures compliance with biohazard labeling regulations. The element™, PEDIGO’s new IV stand, was designed with a number of unique components to further promote safety, organization and efficiency of IV fluid administration. The six hook IV assembly features clearview technology™ making it possible for all IV bag labels to be read easily from the front of the stand. Interlocking base design ensures comfortable transport and storage of multiple element™ IV stands.
Pemco Inc. designs and manufactures precision surgical instruments for the cardiovascular field including perfusion cannulas, suction and anesthesia shields. These innovative products are reusable and offer significant savings over disposable options.

Pemco is the exclusive authorized service facility for Rultract® Retractor products. Pemco provides service and refurbishment of all products we manufacture, extending product life and value to our customers.

New Service Announcement—Pemco Inc. will refurbish and repair older model Hercules Universal Stabilizer Arms. Call our service center for a quote.

Loaners available for Rultract Retractor and Stabilizer Arms.

Continuing education credit approved by IAHCSMM are available at Pemco University, online product training. Visit www.pemcomened.com to register. All courses are provided compliments of Pemco Incorporated and Rultract Incorporated.

PRIMUS STERILIZER COMPANY, LLC
Booth Number 237

The brilliance of every PRIMUS sterilizer is in the simple design incorporating the highest standards of efficiency, reliability and ease of operation for the Healthcare, Research, Pharmaceutical and Laboratory markets.

PRIMUS’ streamlined design of autoclaves reflects our passion for simplicity representing a “less is more” philosophy resulting in the use of less material and fewer resources.

PRIMUS has a steam sterilizer in 11 standard sizes for the healthcare industry.

Every PRIMUS sterilizer is made in the USA in our ASME code production facility by dedicated associates with a commitment to providing the premier American made steam sterilizer on the market.

www.primus-sterilizer.com
Propper Manufacturing Co. has been a leader in healthcare manufacturing for nearly a century. As a mainstay in the sterile processing industry, we have consistently provided high quality sterility assurance products with cost savings. Propper’s primary mission is to contribute to the elimination of hospital-acquired infections through innovation, industry awareness and education.

We have evolved over the past 75 years to maintain our stature in the community while holding strong to our core values. We continue to manufacture products in the United States, meeting the highest domestic and international standards. This enables us to uphold a promise we made to our customers from the start: the promise of cost savings. With each innovation, we weigh the benefits to the field as well as the time and dollar cost to the customer. We have successfully provided new and innovative products while providing a world class customer experience.

www.proppermfg.com

Purdue Digital Education has partnered with IAHCSMM since 1981 to deliver premium educational content to national and international Central Service/Sterile Processing audiences. Over that time we have guided tens of thousands of professionals to prepare them for IAHCSMM certification exams. Our Central Service Technical Training course will prepare you to be a Certified Registered Central Service Technician (CRCST) while the Central Service Leadership course will prepare you for the Certified Healthcare Leader (CHL) exam. Courses are offered as online or correspondence formats to cater to your learning style. We also offer self-study lessons to help professionals maintain their certification through continuing education. We can be contacted at 800-830-0269 or centralserv@purdue.edu.

Serim Research Corporation is a leading R&D company specializing in innovative, high-quality tests for the healthcare industry.

Our Serim PINNACLE™ Monitor for Automated Enzymatic Cleaning was developed for regular monitoring/validation of medical washer disinfectors and ultrasonic cleaners using enzymatic detergents. This test responds to all critical aspects of instrument cleaning (enzyme activity, mechanical action, wash cycle temperature and wash cycle time).

Serim PINNACLE™ Monitor for Manual Enzymatic Cleaning is the only test that determines the presence of active enzymes in manual bath solutions using enzymatic detergents. This product help guard against the use of enzyme detergents that are expired or contain inactive enzymes.

Serim DISINTEK™ High-level Disinfectant Test Strips ensure that high-level disinfectant used in healthcare facilities are at the Minimum Effective Concentration established by the manufacturer. We manufacture tests for use with OPA and GTA solutions.

Our MONITOR™ and GUARDIAN™ products test many water quality parameters including: pH, water hardness and chemical sanitizer/disinfectant concentrations.

DIAMOND CONFERENCE SPONSOR

STERIS is a global leader in infection prevention, decontamination, gastrointestinal and surgical products and services. We offer a unique mix of innovative capital and consumable products, connectivity solutions and services such as maintenance and repair and project planning and design. STERIS’s Instrument Management Services (IMS) offers surgical device management and consulting services to help Customers avoid expensive endoscope, device, and instrument replacement through pro-active maintenance and proper handling. STERIS connects all of these pieces into one complete solution to help SPD professionals mitigate the risk of infection and control costs.

www.steris.com/healthcare
We have solutions that can fit your facility’s needs from Surgical Device and Surgical Instrument Repair to OR/SPD Management & Consulting, Sterilizer Chamber Cleaning and Case Cart Repair, Certified Pre-Owned Equipment, Flexible Scope Repair and Outsourcing. STERIS Instrument Management Services offers convenient options for surgical instrument service and maintenance by highly-trained technicians. Schedule same-day repair with our OnLocation vehicles or have a full-time technician setup in your facility for easy accessibility. Dedicated and temporary engagements are available. A STERIS Instrument Management Services study shows that our surgical device repairs are less expensive on average as compared to the original manufacturer’s repair costs.

At STERIS Instrument Management Services, we are putting Customers at the center of everything we do. Our commitment to you is to provide the value-added services you are looking for: educational programming, preventative maintenance inspections, 360 degree reviews, and insights that improve your profitability and operational efficiency. We are constantly searching for new and innovative ways to keep you up and running. Our capabilities can help you identify equipment in need of immediate repair and ensuring they are READY for your procedure.

SUBURBAN SURGICAL
Booth Number 731

THE KEY WORD IS QUALITY. IT’S OUR SPECIALTY — OUR DRIVING FORCE.

For more than 65 years and three generations, we have designed, engineered and manufactured the highest quality equipment available for the hospital market. We research the needs of the marketplace, design the best products to meet these needs, and manufacture all of our products to exacting specifications. By taking these measures, we ensure that each item we sell performs excellently throughout its entire lifecycle.

Suburban Surgical’s plan is continued growth in the industry through continued customer communication, the development of new products, along with the continued improvement of existing products. We want to provide you with the highest quality products, backed by the highest quality service.

Whether you’re outfitting a brand-new facility, remodeling, moving, or simply looking to add some new stainless steel equipment such as—Open/Closed Case Carts, Supply/Exchange Carts, IV/Mayo Stands and Instrument/Work Tables—SSCI is dedicated to meeting your needs. Call our Sales department today and put us to work for you.

SUMMIT MEDICAL – AN INNOVIA MEDICAL COMPANY
Booth Number 925

InstruSafe® Products by Summit Medical, an Innova Medical Company, uniquely protect and organize surgical instruments throughout all stages of the transport, storage and sterilization processes. Under the InstruSafe brand, two product lines are offered — InstruSafe® Instrument Protection Trays and InstruSafe® Care + Maintenance Products – both of which help to reduce repair and replacement costs and promote instrument longevity.

InstruSafe Trays are organized to give every instrument its own position within the tray and provide 360 degrees of protection. Along with the standard trays offered, the option to create custom tray solutions is also available. Both standard and custom InstruSafe Trays are validated for steam and low temperature sterilization cycles with sterile wrap and popular rigid containers.

InstruSafe Care + Maintenance Products offer solutions to protect, clean and identify instruments. Some of the products available include assorted brushes, tip protectors, identification tape and sterile markers.

SURGICAL SAFETY SCANNER
Booth 339

Surgical Safety Scanner transforms the care of surgical patients by utilizing RFID "Radio Frequency Identification" and RTLS "Real Time Location" technology. We increase patient safety and reduce surgery costs by providing a standardized approach to building trays, checking cases, and tracking instruments. We provide quality reporting for inventory, maintenance, and productivity. We monitor the autoclave process to guarantee the sterilization of instruments, automate maintenance schedules, and reduce the loss of instruments. Do you know where your instruments are?

Terragene has dedicated much of its efforts to investment on investigation, development and innovation of products and processes.

The company is internationally recognized for its innovative ability and quality. Technological products are sold in over 60 countries, meeting the highest quality standards.

Terragene is a company with ISO 13485 certification

THERMO-DIAGNOSTICS
Booth Number 628

IAHCSMM Professional Partner

Steam quality testing and system evaluation services.

If you are experiencing:
- Wet packs
- Stains on instruments or materials
- Drying issues

Thermo Diagnostics can help.

We offer a system evaluation service. We test STEAM QUALITY according to the new ST79 standard. We cover all of North America.

www.thermo-diagnostics.com
The STERIZONE® (R) VP4 Sterilizer offers significant advantages over other low temperature sterilizers. It is the only low temperature sterilizer that can sterilize:

- 3 sets of robotic surgical tools simultaneously
- batteries at the same time as the orthopedic tools
- mixed loads of general instruments up to 75 lbs*

This system offers the lowest cost per instrument sterilized compared to other low temperature hydrogen peroxide systems. It is safer for your patients and staff, and can significantly increase your throughput. And the STERIZONE VP4 sterilizer is the only sterilizer cleared by the FDA and validated to terminally sterilize colonoscopes and gastroscopes.*

The STERIZONE VP4 sterilizer is manufactured by TSO3 Inc., a publicly traded company (TSX: TOS) with offices in Quebec, Canada and South Carolina, USA. Our mission is to deliver a sterile device for every patient.

*See claims on our website for complete details.

US SURGITECH, INC.
Booth Number 111

U.S. Surgitech “Your Source for Medical Products” has a unique understanding of product manufacturing and distribution, we strive to provide innovative surgical solutions for each member of our diverse and wide-reaching client base. This year we are pleased to launch SurgyPad and SurgyNeedle.

SurgyNeedle is our patent-pending, clear & flexible disposable aspiration needle that provides a solution to SPD’s nightmare of reprocessing aspiration needles. The beveled stainless-steel needle tip controls penetration in minimally invasive procedures of cysts and organs. SurgyNeedle has a proximal Luer-Lok connection for the attachment of a standard syringe for fluid aspiration.

FEATURES AND BENEFITS INCLUDE:

- Sterile disposable single use eliminates maintenance, cleaning and sterilization.
- 5mm / 40cm long with Luer-Lock connection for safe, simple insertion through a Trocar.
- Flexible shaft allows for more maneuverability.
- Clear and transparent provides greater fluid visualization.
- Guaranteed needle sharpness every use.

SurgyNeedle is currently available in 15 and 21 gauge size

---

VELMED, INC.
Booth Number 830

Velmed Inc manufactures the STOPPER Corner Shield and the STOPPER Edge Protector. The Stopper Corner Shield prevents holes, rips and tears in the “Blue Wrap” from heavy and sharp cornered Surgical and Loanertrays. The STOPPER Edge Protector helps prevent hole, rips tears along the horizontal edges and underneath the tray by elevating it off the Blue Wrap. It allows for easier sliding of heavy trays and acts as a buffer from trays that might be temporarily stacked on top or placed in a metal rack. When used with the STOPPER Corner no part of the tray sits on the Blue Wrap. This aids in transportation sterilant dispersion, air circulation and faster drying times. The products are Validated for STEAM (pre-vac and gravity), EO, Ozone and PLASMA Sterilization. They are Multi Use, Recyclable and very Environmentally friendly. All products are made in the USA.

www.velmed.us
VENSERO
Booth Number 208

VenSero software provides your Sterile Processing Department with visibility and control of loaner equipment coming into and out of your facility. With a centralized platform shared with the OR and your surgeon practices, coordination with vendors is transparent and automated to ensure compliance and accountability based on industry recommendations and standards.

Take control of your surgical vendors loaner instrumentation with VenSero.
